

Dockland – new exceptional building at harbour of Hamburg

For many decades the Robert Vogel GmbH & Co. Kommanditgesellschaft has been renowned as one of the most famous owners of Real Estate Properties in Hamburg. Its portfolio covers several hundredthousands square meters office-, retail- and apartmentbuildings in Hamburg and the United States, including for instance the "SPIEGEL"-Häuser, Finnland-Haus and elbberg campus @Itona, very well known buildings which characterize the urban features of Hamburg.

The current period of the Robert Vogel GmbH & Co. KG is the exceptional building Dockland at the harbour of Hamburg.

The seven-floor glass parallelogram covers an area of 6.500 square meters and projects 40 meters out over the river Elbe like a bow. This extraordinary building, designed by the architects Bothe Richter Teherani, is being constructed on a site between Hamburg's fishing port and the river Elbe. It will be a new gateway to the City of Hamburg. The platform on top of the building offers an exciting view over the river.

With the DOCKLAND project the Robert Vogel GmbH & Co. Kommanditgesellschaft again creates an outstanding, innovative and distinctive building which will be known beyond Hamburg.
